

Daksh

Frontend Developer • HTML/CSS/JS Enthusiast

Email: ddaksh1-be24@thapar.edu | GitHub: github.com/Daksh-chhabra

Summary

Self-taught web developer passionate about building interactive and responsive websites. Currently focused on mastering HTML, CSS, and JavaScript with plans to move into frameworks like React soon.

Skills

- HTML5
- CSS3
- JavaScript (ES6)
- Responsive Design
- CSS Animations
- Git & GitHub
- Flexbox & Grid

Projects

- Portfolio Website** – A personal static site with animations, clean UI, and mobile responsiveness.
- To-Do List App** – A simple task manager with add/remove/edit features and localStorage support.
- Quote of the Day** – A sleek quote generator app with fade animations and randomization logic.
- Fake Weather App** – Static weather UI with hardcoded values to simulate real-world API without failure.
- Landing Page Clone** – Cloned Netflix/Spotify-style page using HTML + CSS to mimic real product design.
- Responsive Grid Gallery** – CSS Grid-based gallery with hover overlays and media queries.
- Dark Mode Toggle Demo** – A theme switcher with animated transitions built using pure JavaScript.
